

AUTO CRIB® SD7

The AutoCrib **SD7** is a comprehensive storage solution designed to streamline operations, protect critical materials, and adapt to evolving needs. It offers long-term performance and reliability with minimal maintenance. Featuring a user-friendly interface, robust security, and a scalable design, the SD7 enhances inventory management with its large **19-inch** high-resolution touchscreen display. This intuitive interface ensures seamless navigation and real-time monitoring, providing unparalleled convenience for users.

Controlled access ensures that only one drawer opens at a time, allowing for precise and secure retrieval of items based on user permissions. Innovative features, such as integrated barcode scanning, streamline item issuance, while the Cart Mode enhances efficiency by enabling the management of multiple items simultaneously.

Built with flexibility and modularity in mind, the **SD7** comes equipped with seven drawers of varying heights to accommodate different storage needs. . Customize each drawer to fit your needs with adjustable dividers and bins for maximum organization and efficiency. For growing inventory needs, the SD7's expandable design allows for optional auxiliary add-ons, ensuring it evolves alongside your business.

The AutoCrib **SD7** is designed for quick and easy configuration at the customer site. Its intuitive user interface optimizes bin density and flexibility, allowing dividers to be effortlessly slid into place. The system guides you through a simple bin assignment process, making setup straightforward with minimal preparation. Whether performing the initial stock or load, the **SD7** ensures a seamless installation experience with little to no prep work required.

HOW IT WORKS

1. Login – Employees access the **SD7** by using their employee badge or employee number.

2. Select Item – Users then enter the bin number, or scan a barcode on the pick sheet.

3. Dispense – The Smart Drawer system ensures the correct drawer is released for accountability.

Optional: A PIN can also be required as well as prompts to track overhead data like Department Number, Job Number, Customer Number, Tail Number, etc...
