AUTOCRIB

PX150

10.1" Touchscreen

Proximity Scanner

Proximity cards for bins

The PX150 is a simple yet powerful solution designed to take the guesswork out of managing kanban and open bin inventory. Automate the re-ordering process to ensures products are replenished quickly and accurately without relying on manual tracking or paperwork. With just a quick scan of a proximity card, the PX150 instantly triggers a re-order in the AutoCrib software, streamlining the entire replenishment workflow.

To maintain accuracy, each bin can only be scanned once per cycle, eliminating the risk of duplicate orders and unnecessary stock. Once the order is processed through the AutoCrib software, users can bring in new inventory and quickly restock the bin, keeping operations running smoothly.

SOFTWARE

- 🌐 **AutoCrib.net –** Cloud managed portal
- **Over 70 Standard Reports**
- **Access Controls** - Reduce consumption by user
- **Automatically** reorder inventory

FEATURES

24/7
Re-Order Automation
With security and accountability
